INTRODUCTION

Thank you for choosing this Caple Wine Cabinet.

To ensure that you get the best results from your new wine cabinet, we strongly suggest that you read this instruction manual thoroughly before use. If treated with care, your Caple product should give you years of trouble-free use.

To register ownership, please ensure you complete and return the guarantee card supplied with the appliance or visit www.caple.co.uk and register here.

This instruction manual is designed to provide you with all the required information related to the installation, use and maintenance of the appliance.

Please read this manual carefully before using your appliance. It contains important safety advice; it explains how to use and look after your appliance so that it will provide you with many years of reliable service.

Should a fault arise, please first consult the "Troubleshooting" section. You can often rectify minor problems yourself, thus saving unnecessary service costs.

Please keep this manual in a safe place and pass it on to new owners for their information and safety.

WARNINGS

- To prevent damaging the door gasket, make sure the door is fully open when pulling shelves out of the rail compartment.
- The appliance must be positioned so that the plug is accessible. Release the electric cord and move your cabinet to its final location. Do not move your cabinet while loaded with wine as you may distort the body.
- The wine cabinet should be installed in a suitable place in order to avoid touching the compressor.
- After unpacking, make sure that the appliance is in perfect order. If you have any doubt, do not use it and contact your retailer.
- If the supply cord is damaged, it must be replaced by a Caple service agent or a similarly qualified person in order to avoid a hazard.
- This product is not designed for commercial use, it is a household appliance only.
- It is not intended to be used in:
 - › Staff kitchen areas in shops, offices and other working environments.
 - › Bed and breakfast type environments.
 - › By clients in hotels, motels and any other residential type environments.
- This appliance is intended to be used exclusively for the storage of wine.

IMPORTANT

Caple cannot be held liable for any non compliance with these instructions.

ELECTRICAL SHOCK HAZARD

- Read all instructions before using the wine cabinet.
- DANGER or WARNING: Risk of child entrapment.
- Before you throw away your old wine cabinet: Take off the door, leaving the shelves in place so that children cannot easily climb inside.
- Never allow children to operate, play with, or crawl inside the appliance.
- Never clean appliance parts with flammable fluids. The fumes can create a fire hazard or explosion.
- Do not store or use gasoline or any other flammable vapours and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.
- The refrigerant of this appliance is R600a, flammable and explosive articles should not be put in or near the cabinet, to avoid the risk of fire or explosion.
- Cleaning and user maintenance shall not be made by children without supervision.
- When positioning the appliance, ensure the supply cord is not trapped or damaged.

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance.
- Do not locate multiple portable socket-outlets or portable power supplies at the rear of the appliance.
- Do not use plug adapter.
- Store wine in sealed bottles.
- Do not overload the cabinet.
- Do not open the door unless necessary.
- Do not cover shelves with aluminium foil or any other shelf material which may prevent air circulation.
- Should the wine cabinet be stored without use for long periods it is suggested, after careful cleaning, to leave the door ajar to allow air to circulate inside the cabinet in order to avoid possible formations of condensation, mould or odours.
- Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.
- Do not damage the refrigerant circuit.
- Do not use electrical appliances inside the storage compartments of the appliance, unless they are the type recommended by the manufacturer.

Symbol ISO 7010 W021

Warning; Risk of fire / flammable materials

ENVIRONMENTAL PROTECTION

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice. This appliance is marked according to the European directive on Waste Electrical and Electronic Equipment (WEEE).

By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. The symbol on the product indicates that this product may not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. Disposal must be carried out in accordance with local environmental regulations for waste disposal.

For more detailed information about treatment, recovery and recycling of this product, please contact your local council, your household waste disposal service or the retailer where you purchased the product.

CE DECLARATIONS OF CONFORMITY

This appliance has been manufactured to the strictest standards and complies with all applicable legislation, Low Voltage Directive (LVD) and Electromagnetic Compatibility (EMC).

TECHNICAL FICHE

This appliance conforms to all current and applicable energy regulations. To view the Technical Fiche that supports the energy labelling data, please visit the product page on our website www.caple.co.uk

INSTALLATION

BEFORE USING YOUR WINE CABINET

- › Remove the exterior and interior packing.

IMPORTANT:

Before connecting the wine cabinet to the power source, let it stand upright for at least 12 hours. This will reduce the possibility of a malfunction in the cooling system from handling during transportation.

- › Clean the interior surface with lukewarm water using a soft cloth.
Make sure to turn the unit off and unplug it from the outlet.

NOTE

To protect the appliance in transit and delivery the door is packed tightly against the cabinet. When first installed this can mean the door seal appears thinner on one side of the door due to compression, this is normal and once out of the box it will relax over a short period of time and the door will return to the normal position. If you wish to speed up the process you can gently warm the seal with a hair dryer on a low temperature setting. This can help relax the seal helping it return to normal thickness a little faster.

INSTALLATION OF YOUR WINE CABINET

- › Place your wine cabinet on a floor that is strong enough to support it when it is fully loaded.
- › To level your wine cabinet, adjust the front levelling leg at the bottom of the cabinet.
- › Ensure it is perfectly level, as this will minimise any vibrations.
- › This appliance uses flammable refrigerant. Never damage the cooling pipework during transportation.
- › Locate the wine cooler away from direct sunlight and sources of heat (ovens, hobs, heaters, radiators, etc.). Never clean appliance parts with flammable fluids. The fumes can create a fire hazard or explosion. When disposing your appliance, please choose an authorised disposal site.
- › Avoid locating the unit in moist areas.

- › It is fitted with a power cord having an earth wire terminating in a 13amp plug.
- › Ensure the product is correctly ventilated (see page; 13 & 14).
- › Consult a qualified electrician or service engineer if the earthing instructions are not completely understood.
- › Plug the wine cabinet into an exclusive, properly installed-grounded wall outlet. Do not under any circumstances cut or remove the third (ground) pin from the plug. Any questions concerning power and/or grounding should be directed toward a certified electrician or Caple service.

WARNING:

Incorrect earthing can result in the risk of electric shock.

OPERATING YOUR WINE CABINET

Please use the cabinet within ambient temperatures between 16-32°C, if the ambient temperature is higher or lower than this, it will cause the temperature to fluctuate in the cabinet, possibly preventing it from reaching 5-18°C.

SETTING THE TEMPERATURE

Set the desired cooling temperature by pressing the up and down keys. Each press of the keys will scroll through the available temperature settings in increments of 1°C.

The temperature setting can be adjusted from 5°C to 18°C

To view the actual temperature at anytime press and hold either up or down for approximately 5 seconds, the actual temperature will temporarily flash in the LED display for 5 seconds. After this it will revert back to the set temperature.

Flashing LED = Cabinet temperature

Steady LED = Set temperature

NOTE

If the unit is unplugged, power lost or turned off, you must wait 3 to 5 minutes before restarting the unit. If you attempt to restart before this time delay, the wine cabinet will not start.

When you use the wine cabinet for the first time or you restart the cabinet after having been shut off for a long time, there could be a few degrees variance between the temperature you select and the one indicated on the LED readout. This is normal and it is due to the length of the activation time. Once the wine cabinet has been running for a few hours everything will be back to normal.

CONTROL PANEL

BUTTONS

- Light - Used to switch the internal light on/off
- Power - To switch the appliance on/off
(press and hold this button for approximately 3 seconds)
- Up - Used to raise the temperature in 1°C increments
- Down - Used to lower the temperature in 1°C increments

TEMPERATURE ALARM

If inner temperature is higher than 23°C, "HI" is shown in the display panel, and the alarm sounds after one hour continuously. It warns you that the inner temperature is too high.

If inner temperature is lower than 0°C, "LO" is shown in the display panel, the alarm sounds and the malfunction indicator lights at the same time.

INTERNAL LIGHT

In order to reduce energy consumption, the LED light within this wine cabinet will automatically switch off after 10 minutes. If you would prefer the LED light to remain on continuously, this is possible. Please press and hold the light key for 5 seconds, the display will show "LP". After 4 seconds the display will revert back to normal and the light will remain on until manually switched off.

If you would like to revert back and conserve energy (recommended), press and hold the light key for 5 seconds, the display will show "LF". After 4 seconds the display will revert back to normal, and the light will automatically switch off after 10 minutes.

HOW TO CHANGE THE DOOR OPENING

This appliance has reversible doors but is delivered with a right hinged door. The left hand hinge kit comes with the unit (in the box), should you wish to reverse the hinge on your unit follow the directions below:

1. Open the door to a 90 degrees angle, take out the 2 screws (2) from lower door axis (3), remove the door (4), Remove the axis plate (3) from the door, (Fig. A).
2. Unscrew the screw (11) located underneath the door frame and the limit device (10), and relocate it at left end side of the door frame. (Fig. A/B)
3. Take out the 3 hinge screws (6) from the top hinge (right) (5) and remove it. (Fig. C)
4. Remove decorative nail (8) from left top of cabinet and install spare top hinge (Left) (7) at left top of cabinet with 3 screws. (Fig. D)
5. Following the above procedure, install the spare lower hinge to the left (9). (Fig. E)
6. Install and aligned the door.
7. Insert the plastic caps to cover the holes(8).

INSTALLING THE HANDLE

Remove the door gasket on the drilled holes side to install the handle (see below drawing). Fix the handle to the screws and push the gasket back into place.

Visit our caple website to view a 'How to video' at WWW.CAPLE.CO.UK

Scan the QR code below to access the 'How to video'

INSTALLING THE FULL HEIGHT PLINTH GRILLE

Take out the full height plinth grille and the brackets from the accessories box. Fix the brackets to the cabinet with screws provided and fix both sides of the grille to the brackets with the 2 supplied screws as shown in below diagram.

NOTE: To be installed with a 150mm plinth height.

If you wish to reduce your plinth height, the smaller, slot-on plinth grille (see page 14) should be used.

FITTING A KITCHEN PLINTH

This model is also supplied with a slot on plinth grille if the previous method/grille is not preferred. A H75mm vent slot is required in the plinth to ensure air is able to ventilate correctly. See diagram below.

WINE BOTTLE STACKING

Stores max. 8 Bordeaux style bottles 750ml.

INSTALLATION DIMENSIONS

FIXING THE TOP FIXING BRACKET

After installing the wine cabinet, please open the door, adjust the fixing bracket (a) and fix this in position with three screws (c) using a screwdriver (d) into the work surface (b).

a) Top fixing bracket

b) Work surface

c) Screw

d) Screwdriver

This bracket will keep the product secure and help prevent it moving when in use.

USING THE FOOT SLIDERS

If you want to adjust the height over 820mm, please install the product using the foot sliders provided. These are provided to help prevent the feet catching on the floor when sliding the appliance into the aperture. Place the back foot in the location marked 'Back' below and the front foot in the location marked 'Front'. Once fitted to both sides of the wine cabinet the appliance can be gently positioned into the aperture, taking care not to place excess pressure on the feet when locating the cabinet.

CARE AND MAINTENANCE

CLEANING YOUR WINE CABINET

- › Turn off the power, unplug the appliance, and remove all items including shelves and rack.
- › Wash the inside surfaces with a warm water and baking soda solution. The solution should be about 2 tablespoons of baking soda to 2 pints of water.
- › Wash the shelves with a mild detergent solution.
- › Wring excess water out of the sponge or cloth when cleaning area of the controls, or any electrical parts.
- › Wash the outside cabinet with warm water and mild liquid detergent. Rinse well and wipe dry with a clean soft cloth.

NOTE

Please take care when cleaning the plinth grille as this may contain sharp edges

POWER FAILURE

Most power failures are corrected within a few hours and should not affect the temperature of your appliance if you minimise the number of times the door is opened. If the power is going to be off for a longer period of time, you need to take the proper steps to protect your contents.

HOLIDAY

SHORT HOLIDAYS: Leave the wine cabinet operating during holidays of less than three weeks.

LONG HOLIDAYS: If the appliance will not be used for several months, remove all items and turn off the appliance. Clean and dry the interior thoroughly. To prevent odour and mould growth, leave the door open slightly (blocking it open if necessary).

MOVING YOUR WINE CABINET

- › Remove all items.
- › Securely tape down all loose items (shelves) inside your appliance.
- › Turn the adjustable leg up to the base to avoid damage.
- › Tape the door shut.
- › Be sure the appliance stays secure in the upright position during transportation. Also protect outside of appliance with a blanket, or similar item.

ENERGY SAVING TIPS

The wine cabinet should be located in the coolest area of the room, away from heat producing appliances, and out of the direct sunlight.

TROUBLESHOOTING GUIDE

You can solve many common wine cabinet problems easily, saving you the cost of a possible service call. Try the suggestions below to see if you can solve the problem before calling

CAPLE SERVICE.

PROBLEM	POSSIBLE CAUSE
The wine cabinet does not operate	Not plugged in. The appliance is turned off. The circuit breaker tripped or a blown fuse.
The wine cabinet is not cold enough	Check the temperature control setting. External environment may require a higher setting. The door is opened too often. The door is not closed completely. The door gasket does not seal properly.
The compressor turns on and off frequently	The room temperature is hotter than normal. A large amount of contents has been added to the wine cabinet. The door is opened too often. The door is not closed completely. The temperature control is not set correctly. The door gasket does not seal properly.
The light does not work	Not plugged in. The circuit breaker tripped or a blown fuse. The bulb has burned out. The light button is "OFF".
Vibrations	Check that the appliance is level and installed on a flat, even surface
The wine cabinet seems to make too much noise.	The rattling noise may come from the flow of the refrigerant, which is normal. As each cycle ends, you may hear gurgling sounds caused by the flow of refrigerant in your wine cabinet. Contraction and expansion of the inside walls may cause popping and crackling noises. The wine cabinet is not level.
The door will not close properly	The wine cabinet is not level. The door was reversed and not properly installed. The gasket is dirty. The shelves are out of position.

If the above table has not solved the problem please contact Caple Service by phone on **0117 938 7420** or by email **service@caple.co.uk**

DEFROSTING/CONDENSATION

Your wine cabinet is designed with an "Auto-cycle" defrost system. When the RUN cycle is OFF, the refrigerated surface of the wine cabinet (interior rear wall) defrosts automatically. The defrosted water is channelled into a drain pan which is located at the back of the cabinet next to the compressor from where it evaporates.

RECOMMENDED TEMPERATURES

RECOMMENDED STORAGE TEMPERATURES:

BEVERAGE	RECOMMENDED TEMPERATURE
For storing all types of wines	12°C to 14°C
